Work Experience

VGO - Multi-Purpose Shopping and Delivery **Mobile App**

Duration: June 2023 - October 2023

Full-Stack Developer

Project Overview:

Developed a suite of mobile apps for an integrated shopping and delivery platform:

- Customer App: Enables users to browse and purchase products.
- · Shop Management App: Allows shops to manage inventory, orders, and sales.
- · Shipper App: Supports delivery personnel with real-time tracking and task management.

Responsibilities:

- Designed and implemented the UI/UX for all three apps using React Native, Tailwind, and MUI.
- Built real-time order and delivery tracking systems using Firebase.
- Developed secure user authentication and multi-role access management.
- · Integrated push notifications to enhance user engagement.
- Ensured smooth cross-platform compatibility for iOS and Android.

Achievements:

- · Delivered the project 2 weeks ahead of schedule.
- Successfully handled over 5,000 daily transactions.
- Received positive feedback from users for simplicity and efficiency.

Korean Exam Preparation Website DevelopmentDuration: April 2023 - June 2023

Full-Stack Developer

Project Overview:

- Created a website for Korean language learners to practice exams. The platform included real-time grading, progress tracking, and user feedback features.
- URL: https://topik6.vercel.app/

Responsibilities:

- Designed the website architecture and implemented a responsive frontend using React.
- Developed backend APIs with Firebase for real-time grading and data storage.
- Enhanced user experience with real-time progress tracking and detailed feedback.

Achievements:

- Attracted 1.000+ users within 3 months of launch.
- Achieved a 90% user satisfaction rate based on surveys.

Shop Website Development

Duration: January 2023 - April 2023

Full-Stack Developer

Project Overview:

 Built an online shop for a boutique with features like product management, shopping cart, and payment integration.

Responsibilities:

- Developed the frontend with React and integrated responsive design using Tailwind and MUI.
- Implemented backend APIs with Node.js and MongoDB for seamless data management.
- Integrated Stripe API for secure online payments.

Achievements:

- Increased online sales by 25% within 6 months.
- Improved user retention by 40% through intuitive design and performance optimization.
